

Sleep

A photograph of a young child lying in a hospital bed. The child is wearing a blue hospital gown and has a clear oxygen mask over their nose and mouth. They are holding a small yellow object in their right hand. The bed has white linens with a cartoon pattern. In the background, there are several stuffed animals, including a yellow duck and a white lamb, and a large yellow balloon. A grey balloon is visible in the lower left. The room has white vertical blinds. Overlaid on the image are several text boxes: 'Sleep' in a blue box at the top left; 'Health condition disorders/diseases' in a white box at the top center; 'Impairment' in a white box on the left; 'Activity' in a white box in the center; 'Participation' in a white box on the right; and 'Contextual factors' in a white box at the bottom center.
